

Workspaces | Quick Start Guide

Workspaces are a collaborative environment for students and teachers to code.

Interface

Infinitely customizable.

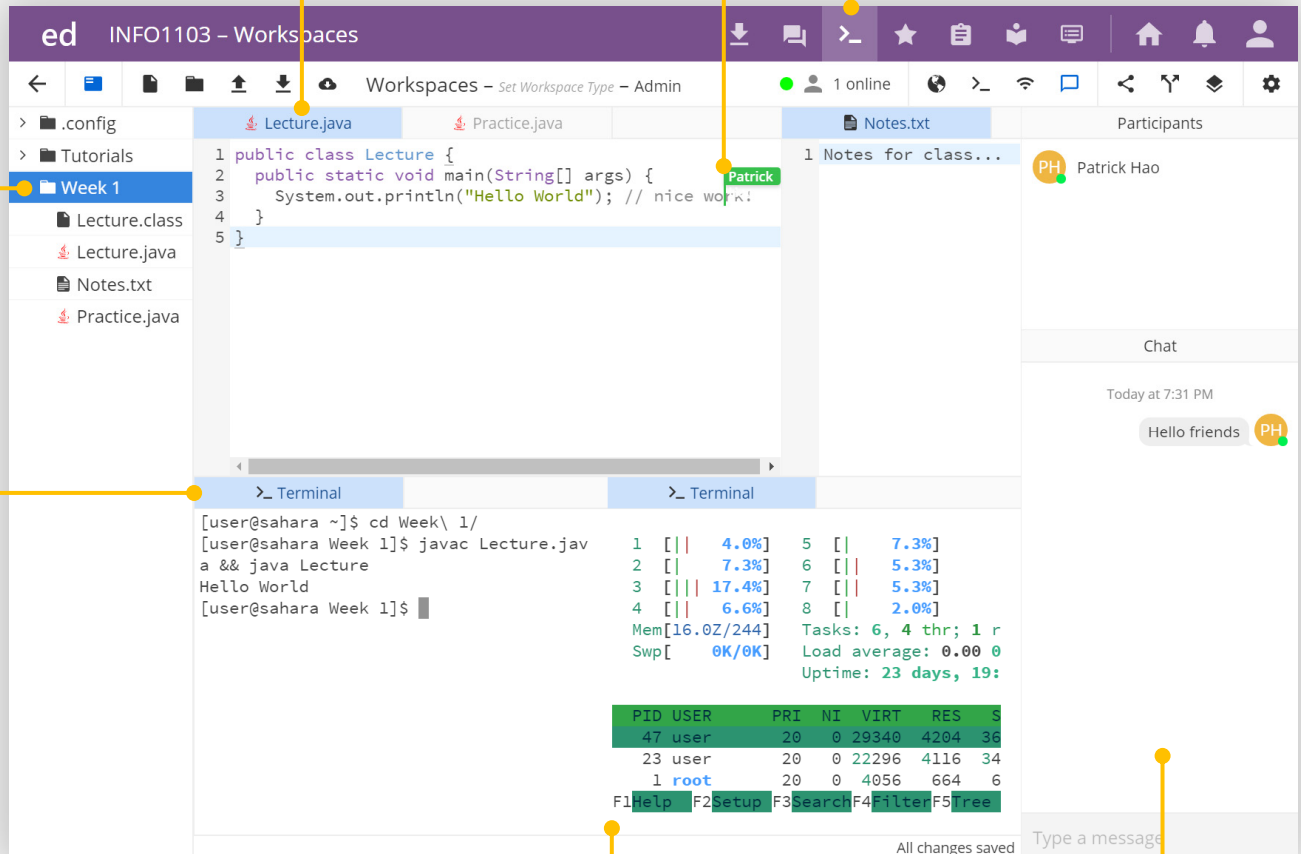

Open as many
tabs as you want

Code **collaboratively**

Click here to open **workspaces**

Organize your
workspace
using **folders**

Open as many
terminals as
you want

Arrange your workspace to your needs

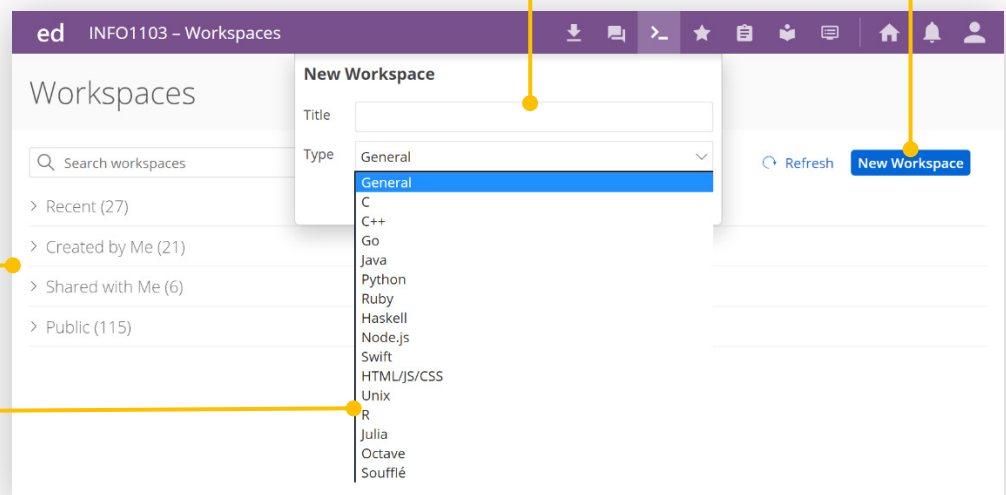

Chat with students and teachers

Create a new workspace

1. Click **New Workspace**
2. Insert a **Title**
3. Select a **Type**

Workspaces are **organized**
automatically

Select **Type** here

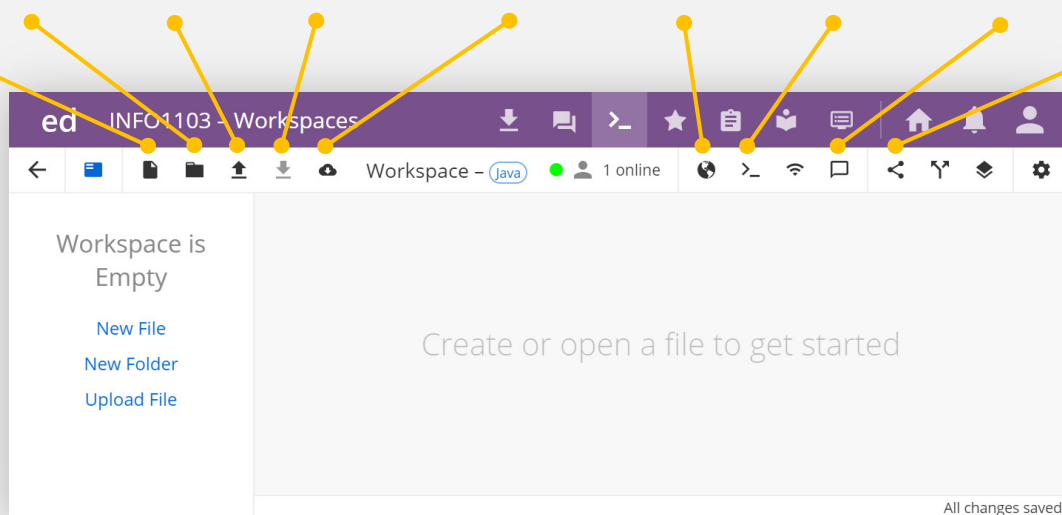

Insert **Title** here

Click **New Workspace** here

Set up your workspaces in any way

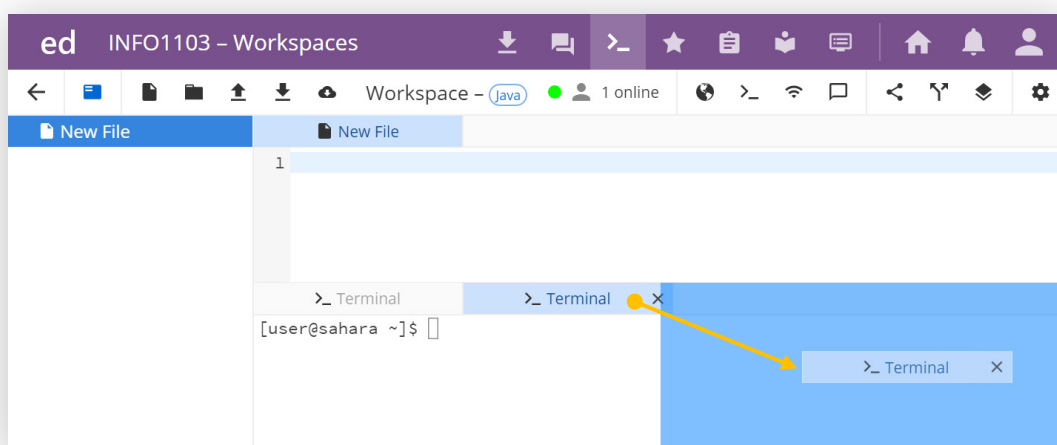

Tailor your workspace to your needs.

Create a new **file** Create a new **folder** Upload a **file** Download a **file** Download your **workspace** Web **preview** Open a new **terminal** **Chat** with someone **Share** your workspace

Just drag and drop

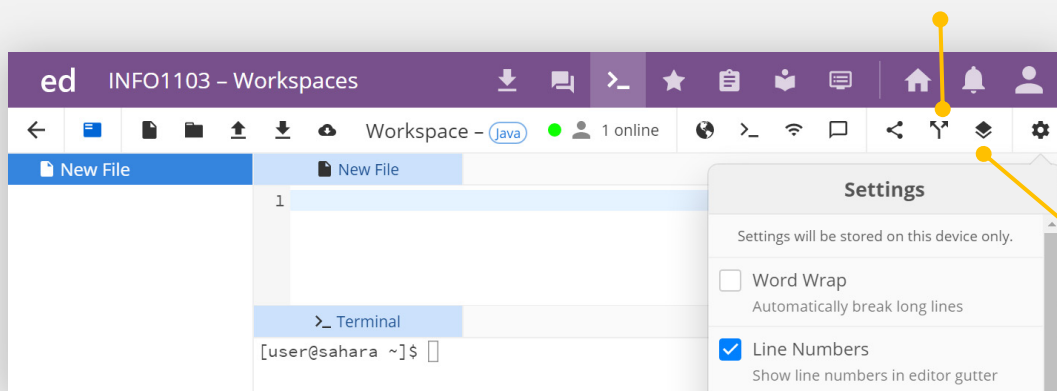

Make your workspaces as simple or as complex as you want.

Tips and tricks

Fork workspaces, change settings, view revisions and more...

Click here to **fork (duplicate)** a workspace
Want to listen while the teacher is coding? Just fork their workspace at the end to make a copy!

Change **settings** here

View **revisions** here
